

## Restorative Practice Agreement

Restorative Practices is an educational intervention that emphasizes owning behaviors, actions and words in an effort to “make things right”. This educational intervention is non-disciplinary in nature and avoids labels and supports learning above all else. It is highly reflective in nature and is proven to engage students in the learning process that is required to solve conflict and rebuild relationships.

In an effort to resolve a school-based issue, I, \_\_\_\_\_, agree to complete the following and return it to Mr. Sullivan or Mrs. Dean by \_\_\_\_\_ . Any future behaviors that are of the same nature will be handled with traditional disciplinary responses.

1. Read and thoroughly answer the questions outlined on the attached sheet.
2. Using the blue book provided, log and describe at least one positive behavior/interaction you have for the next \_\_\_\_ days.
3. Pretend you are 25 years old. Write a letter to your 14 year old self describing who you have grown into and why you are proud of who you are. You can include education, relationships, career, and athletics – anything!
